Conclusion

# Proof of Concept and Differentiation from Wharton

## Wharton

- 10 cohorts
- Lack of Community
- No events after o-week

## What

- Build friendships faster
- Improves collaboration
- Encourages friendly competition

## How

- Competition encourages participation & spirit
- Points from events and wins accumulate
- Final winner engraved on the Dyson Cup

# Execution Timeline

## Planning Phase (December to March)

- Confirm administrative approval
- Interview and recruit 12 district leaders
- Brainstorm game ideas that engage everyone
- Start a social media campaign
- Order colored shirts for districts

## Preparation Phase (Early August)

- Add Dyson Games to orientation events
- Gather equipment for activities
- Randomly divide students into districts
- Prepare email with district info
- Create a music playlist for houses

## Orientation Timeline

Leaders attend and hype up Dyson Games to new students

Send email with district results and tell people to find their leaders at the end of the event

Leaders bring energy and go through the different games

**First Dyson Orientation Event**  
**August 19<sup>th</sup>**

**Second Dyson Orientation Event**  
**August 20<sup>th</sup>**

**Dyson Games**  
**August 22<sup>nd</sup>**

# Risks and Mitigations

## Leader Burnout

### Faculty Leaders

Provides stability and guidance for students.

### Co-leader model

Two leaders support each other to prevent overload.

## Enthusiasm Decline

### Weekly games

Consistent challenges that maintain high student engagement.

### Wildcard Weeks

Simple surprise challenges that boost energy.

## Uneven Dynamics

### Leadership Training

Ensures all leaders have the skills to include everyone.

### House Starter Kit

Houses begin with the same tools and resources.

**Financing**

Conclusion

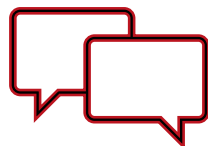

# Measuring Success

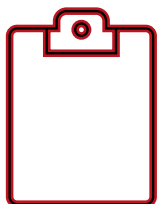

**80% first-year participation** in at least one challenge to measure involvement in the games

**Each House hosts 2 bonding events** (meals or social activities) to build real connections

**60% weekly Group Chat engagement** as a sign of steady communication and inclusion of quieter students

**End-of-semester student survey** with a target of 85% reporting meaningful connections.

## Participation Scoring:

Each house will get a grade based off how much members met all the metrics

This will translate to a grade and a corresponding number of points, to force houses to promote participation within their groups. We can use this to also measure the success of the idea.

| Participation<br>(% of engagement) | Letter Grade<br>(Shared with House Leads) | Points for the House |
|------------------------------------|-------------------------------------------|----------------------|
| A                                  | 90-100%                                   | 200                  |
| B                                  | 80-90%                                    | 150                  |
| C                                  | 70-80%                                    | 50                   |
| D                                  | 0-70%                                     | 0                    |

Conclusion

# Transforming to a Tradition

## Keep core structure consistent

Six Houses, orientation kickoff, weekly challenges, bonding events, and Dyson Cup finale.

## Create a *Dyson Districts Binder*

Challenge templates, budgeting guidance, and promotional examples for future leaders.

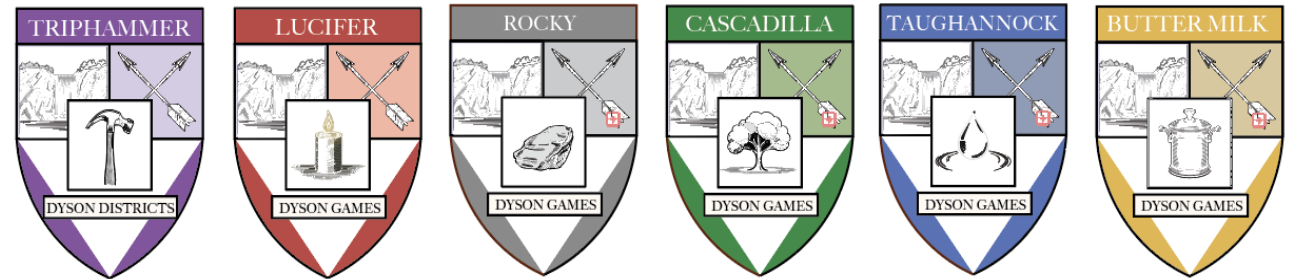

## Maintain a leadership pipeline

By training new House Leaders each year and documenting what worked well.

## Seek long-term support

Through Dyson administration and potential alumni donations to ensure sustainability.
